

## Schedule A - Electric Distribution Company Charges

For comparison to your supplier's electric supply service price, the tables below include The Connecticut Light and Power Company d/b/a Eversource Energy ("Eversource") and The United Illuminating Company's ("UI") Standard Service supply rates that you do not pay by enrolling with your supplier. But the supply portion of the bill is not your total bill. In addition to the price for your electric supply service from your supplier, you will continue to pay Eversource or UI, as the case may be, for delivery service. The Eversource and UI delivery service charges effective July 1, 2020 are provided below. Eversource's Last Resort Generation Service rates are effective October 1, 2020. The Eversource charges listed below reflect the Public Utilities Regulatory Authority's suspension of rate increases by letter dated July 31, 2020 in Docket No. 20-01-01. If your utility rate class is not listed below, please contact your supplier for additional information. **All rates are in dollars per kWh unless otherwise stated.**

\*The Systems Benefits Charge, the Conservation Charge, the Conservation Adjustment Mechanism, and the Renewable Energy Charge are combined for billing purposes into the Combined Public Benefits Charge.
